

Internet Service Providers for our area

May 2023

5G Wireless Network / Hotspots

Cons

Not widely available in our community. Quality of service at your location depends on distance to the microwave antenna and if there are obstructions, like trees, in the way.

Pros

Fastest speeds, over 200Mbps for downloads and over 15Mbps uploads. Cost relatively inexpensive.

T-Mobile Home Internet

1-800-T-Mobile www.t-mobile.com

Verizon Home Internet

www.verizon.com

Nikola Broadband

360.582.1051 www.nikolabroadband.com

DSL

Cons

Slowest speeds. Download max about 8Mbps, uploads about 8Kbps. If you stream videos or game online, or you upload large files such as videos or photos, DSL in our area may be too slow. Fiber to the home is not available here. Distance from the hub determines speed available at your home.

Pros

Widely available in our community at reasonable cost.

CenturyLink

888.963.6665 www.centurylink.com

Satellite

Cons

High up front equipment costs. High monthly rates. May have data and speed limits. Obstructions, like trees, will limit availability of service. High latency may impact gaming ability.

Pros

Widely available with a clear view of the sky. Speeds under 200Mbps download and around 15 Mbps upload.

HughesNet

844.962.2449 www.hughesnet.com

Starlink

www.starlink.com

ViaSat

855-627.2555 www.viasat.com
